

Xterminator 2

Reference: Q40Q

£3,628.56

Xterminator 2 The Xterminator 2 has all the features of the Wipeout 2 however instead of the automatic chemical application system it has a manual application system, so the user controls the chemical application themselves. The Xterminator 2 comes without tank as standard. Images show the unit equipped with 60L sprayer tank, which is optionally available alongside with a 100L tank upgrade. New enhanced features of the Xterminator 2 include: 14% less chemical usage- thanks to further R&D on the chemical application process. New tank retaining system- new tank positioning for balanced weight distribution. Improved frame design for extra strength- even more lightweight. Improved design for maintenance- reduces service time and no tools required. A herbicide applicator is the ideal solution to treating weeds which are taller than the grass. Unlike boom spraying the Quad-X herbicide applicators treat only the weeds giving faster kill rates while saving chemical without stinting the grass and clover growth. Quad-X have developed a range of revolutionary weed wipers to deal with the toughest of weeds in an environmentally sensitive way reflecting concern for conservation and preservation of wildlife habitats. Designed and Manufactured in Northern Ireland Features Dual Roller - Absorbent long fibre synthetic Contra rotating rollers- for less drips and optimum chemical retention and application. Unique Atomisation Technology for better chemical application - Through considerable development time and investment, we have discovered a process of unique atomisation technology where chemical is applied in the form of a micro bubble which attach themselves to the open fibre roller without bursting. Upon contact with the weed the micro bubbles burst and provide better stem coverage than the standard chemical film approach. Width: Total width of machine is 2.4m/8ft Tyres: Knobby 22-11X8 flotation tyres which make the machine suitable for use on soft/wet ground, also optional chemical application, no pick-up on the wheels Height Range - With the largest height range on the market; they can be adjusted from 140mm - 380mm Drawbar - The Unique Drawbar is

designed so the roller is first to come into contact with weeds after the towing vehicle (weeds aren't knocked down by drawbar) Options Spring Assisted Lift and Jockey Wheel - Designed for easy height adjustment Handlance Kit - Spray while you wipe - ideal for those hard to get at spots Wiring Kit and Pressure Control 60L UV Protected Tank - The Weed Xterminator 2 has the option of coming with a 60L UV Protected Tank, which also comes with Superpump which comes with an unrivalled 3 year parts warranty. 100L tank is also available to add to the wiper Cigarette filter Bout maker 3-pin power supply Please use the drop-down menu to choose options Specification Total width 2.4m/8ft Contact width 2.16m Video demonstration Delivery time on this item is estimated at 3 weeks.
