

## Sweeper Collector - Self-Powered

Reference: BPT122

**£5,496.00**

Designed for the maintenance of private estates, parks & large gardens. The MTC-120-E Sweeper Collector is an easy to use, yet highly effective machine which is self powered via a Honda 5.5hp engine, making it the perfect tool to pair with an ATV or UTV. Designed for the maintenance of private estates, parks & large gardens, the MTC-120-E sweeper collector is ideal for collecting autumn leaves, grass clippings & scarifying debris. Choose from three options: self-powered, mounted or trailed. When full, the hopper is rolled over by means of a hand operated winch to give a clean discharge on the ground. The hopper is finely balanced on the pivot point to ensure an easy roll-over while a spring-loaded pin secures the hopper in position when in operation. Key features Available in three options: self-powered, mounted or trailed For sweeping all areas from car parks to sports turf Self-powered by Honda 5.5hp engine Simple brush height adjustment via castoring front wheels Specification Working width 1.2m Overall width 1.85m Hopper capacity 0.7m<sup>3</sup> (approx.) Weight 290kg Engine 5.5hp Honda
