Reference: TXBR21

**£3,232.92**

This version of the PSU is supplied on a two wheel chassis having suspension units and required lighting. Features The hand held suction nozzle is fitted to three meters of 200mm diameter hose The discharge is via a metal tube with a swivel base to allow the direction to be altered The discharge head is also adjustable A jockey wheel and 50mm ball hitch is fitted as standard The fan belt is driven and not fitted directly onto the crankshaft of the engine This version of the PSU is supplied on a two wheel chassis having suspension units and required lighting. This large leaf suction unit is hungry to clear up large areas of fallen leaves. The PSU fan unit with its powerful 9hp Honda engine is mounted on a two wheel chassis with an integral tow bar . The favourite way of using the unit is to attach it to the rear of the leaf collecting trailer. This trailer can be supplied with trailer adaptation kit or you could modify your own trailer. The discharge hose is attached to the rear of the trailer. The operator this is able to suck up fallen leaves efficiently. A combined team of the suction hose operator and a tractor driver can clear along drives and road edges at very impressive speeds. The leaves passing through the fan are chopped up, greatly increasing the capacity of the trailer - meaning less empties per day. Many operator use this in conjunction with a hand held blower. Suck out leaves from flower beds and awkward areas and then collect them with the suction unit. The fast tow version is fully road legal with a fixed discharge shoot to load in the rear of the towing vehicle. Specification Width 1320mm (52.5") Length 1500mm (60") Weight 105kg Engine 9hp Honda Petrol Suction Hose 200mm (8") Discharge hose length 1000mm (39")
